Introduction:

VSOL HG5033-AX30-3G(3GE+USB3.0+WiFi6 AX3000) Wireless Router is a commendable high-performance product. It not only has super high network transmission speed, but also adopts the innovative 5-antenna design, which has an extra antenna for signal transmitting and receiving in the 5GHz band compared with similar wireless routers, effectively making up for the coverage blind spot in the traditional antenna design. Equipped with AX3000 chip, embedded with Wi-Fi black technology, it provides users with outstanding performance. In addition, HG5033 also supports Mesh networking technology, which realizes full Wi-Fi coverage and seamless roaming, bringing users an excellent network experience.
